### OTHG History by John Justus

10 years ago August 2013

In his Prez Sez column President Dick Raczuk wrote that writing this article is the hardest thing that he has to do as club president. He also mentioned that there will be a “Goodguys Night on the Street” on September 29 that will feature the dedication of the car club tower. Dick was also the subject of the member profile. He graduated with a degree in music and industrial arts. After a stint in the Army he worked as a draftsman and sold precision gears. Next he owned a Go-Kart shop and also raced them. That led him to design Go Kart racing exhaust systems and other kart racing equipment. His shop also did R&D work for American Honda. In addition to his street rods he also has several classic cars and a home shop to die for. The car of the month was John Gervais 1956 Ford pickup. Dick's shop tip article was about using a drill press that has an adjustable table. Club dinner cruises went to Jersey Grille and Chico's Tacos. The club also joined the Havasu Classics for a lunch cruise to Stroke's on the river. There was no mention of a 50/50 winner.

### Prez Sez by Brad Lano

Here we are, the July heat came with a vengeance. August is not much better but that doesn't mean we can't have fun. I hope everyone had a good Holiday. We had a great turnout at Mudshark's. I would like to thank everyone for coming. I missed Scotties this past month, but I hope it was a good turnout. September will be busy month. The Board Meeting and our Monthly Meetings will start back up and we will have a lot to cover. Keep reading the road rash for upcoming events.

## "Shop Tip" by Dick Raczuk

**Tip 1** When starting up your car, start the car first, then put on your safety belt and so forth. Gives the engine chance to circulate the oil. Pass this on to the family.

### Tip 2

1. Before attaching gages to high pressure tanks, crack the valve a bit to blow out any contaminants. It's pretty easy for foreign matter to get settled in the threaded port during storage. This will insure that upon hooking up the gages, they won't ingest something that doesn't agree with them.
2. If you're having trouble with your files clogging up while filing aluminum, fill them up with ordinary blackboard chalk. Doing this and a good file card works great. Does everybody have a file card? Get one. Also for filing aluminum, you can purchase a type "A" aluminum file mfg. By Nicholson. It doesn't clog. They last forever.
3. It's a good idea to hang your files and not having them bang into each other in a drawer. They tend to smooth each other out every time the drawer is opened and closed. A good file will last forever if you take care of it.
4. Files only cut on the forward stroke. Don't wear yourself out using pressure on the back stroke.
5. Don't store files in your filing cabinet.
